Research Details :

Research Title : DENTAL ANXIETY AND ITS RELATIONSHIP TO DENTAL AND DENTAL ANXIETY AND ITS RELATIONSHIP TO DENTAL AND

Descriptipn : For the Pedodonlic team, a childs dental anxiety poses major management problems, as an anxious child may require more time for treatment, cause stress for the clinicians and is very likely to miss appointments. Thereby, measurement of dental anxiety not only makes the dentist forewarned about the patients behavior.

Research Type : Thesis
